Single Malt Scotch is whisky made in Scotland using a pot still distillation process at a single distillery, with malted barley as the only grain ingredient. As with any scotch whisky, a Single Malt Scotch must be distilled in Scotland and matured in oak casks in Scotland and for at least three years (most single malts are matured longer) "Single" indicates that all the malts in the bottle come from a single distillery. Multi-distillery malts are usually called "blended malt", "vatted malt" or "Pure malt".
